EXAMINER'S ACTION

Art Unit: 1201

The instant communication is responsive to applicants' papers filed 4-20-95 (paper #s 23-24) and 4-27-95 (paper #25).

Applicant's election with traverse of 4-20-95 in Paper No. 24 is acknowledged.

1. Request for reconsideration of the election of species requirement:

The species election requirement is hereby withdrawn by the examiner for Group I invention which now contains claims 140-142. Although the claims are drawn to more than one patentably distinct species, it would not pose an undue burden to the PTO to examine all the subject matter of claims 140-142 together in the instant case.

2. Request for rejoinder of invention for Groups II-IV:

The traversal of the restriction requirement is on the ground(s) that although the inventions of Groups II-IV are separably patentable, the literature search would be the same, and no serious burden should result from examining these inventions together. This is not found persuasive because the invention are drawn to different chemical processes of making which require materially different process steps which would require different searches in the journal, technical and industrial literature and therefore would pose an undue burden on

- VI. Claims 104-106, drawn to methods of making;
- VII. Claims 107-111, drawn to compounds;
- VIII. Claims 112-114, drawn to methods of making.

4. Claims withdrawn by the examiner:

Claims 5, 13, 24, 54, 62, 73 and 103-139 are withdrawn from further consideration by the examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention, the requirement having been traversed in Paper No. 24.
